

**FLEX - SERIES  
HEIGHT ADJUSTABLE TABLE BASES**

## Features:

- Lifting column, feet and supports and stretcher bar are all steel
- Maximum thrust 350lbs.
- Speed of Adjustment is 38mm / second (1.5")
- Low Noise level
- Adjustment range = 25.5" (24.5" – 50" with 1" thick top)
- Rigid design maximizes floor space without sacrificing stability
- Adjustable width frame supports tops from 48" to 80" wide
- Precision balanced lifting columns minimize surface vibration
- Full clearance under the work surface meets ANSI/BIFMA ergonomic guidelines
- Electronics are UL and CE recognized components
- Digital Handset with four memory positions
- Full Five-Year Warranty

## Usage:

Duty cycle: 10 % ~ 6 min. per hour or 2 minutes continuous at full load

- Ambient temperature: +10° to +40 °C

Digital Handset

Electronic Switching Control Box
