

Rhino PlusTM

SPECIFICALLY DESIGNED FOR
MED-TECH ENVIRONMENTS

cramerinc.com

Our patented Rhino Plus[™] covering combines ultra-durable urethane over molded foam for all-day comfort and cleanability.

No other Med-Tech seating brand offers anything close to the year-over-year durability and all-day comfort of R+ Technology. Our thick, yet supple, urethane covering is resistant to punctures and tears while the molded foam cushion provides consistent support through long work days.

NON-SLIP + ACTIVE SEATING

Today's Med-Tech environments require seating that moves with the user, providing a stable work platform. The R+ covers and slightly raised ridges provide just enough grip to allow users to lean forward and maintain a comfortable posture without the slipping often associated with vinyl and synthetic fabrics.

// **Unique non-slip texture**

// **Maintain forward-leaning posture**

// **Higher friction coefficient than vinyl**

Anti-Microbial & Anti-Bacterial

The demanding nature of Med-Tech environments means seating surfaces need to meet high standards of performance and function. R+ features anti-microbial and anti-bacterial seamless construction to protect against dirt and impurities. It's textured exterior provides for easy cleaning.

// **Seamless chemical resistant molded cover**

// **Soil & stain resistant**

// **Cleanable with bleach, ethanol or other harsh chemicals**

Ultra-Durable Construction

// **Puncture & tear resistant**

// **1/8" thick polyurethane**

// **3" thick premium molded foam**
